

Hospital Reduces Energy Consumption And Receives Huge Rebate

Boston, Massachusetts

"Avi-on's gateway free technology does not require any network infrastructure to be installed which allows for a quick and easy install and saves time and money for our retrofit projects."

--Eric Hanian
Energy Management Consultants

Energy savings rebates of \$300,000 for 1,200 fixtures

This Massachusetts hospital saved over 800,000 kWh annually with the help of Avi-on wireless controls and a lighting retrofit. Avi-on advanced wireless controls also help the hospital qualify for over \$250,000 in utility incentives.

- **Avi-on Lighting Controls are flexible, easy to install, and easy to change.** The Energy Savings International fixtures arrived onsite with the controls onboard and setup to simplify the installation.
- **Avi-on Lighting Controls are easy to expand and scale in phases, saving thousands in installation costs** with **no gateways** required. With a large section of the building already powered by Avi-on, it was easy for installers to expand the network and setup the new phase.

Sustainable Lighting Solutions

Energy savings features are inherent in all Avi-on Control products. For customers interested in securing top-tier utility rebates, Avi-on offers advanced lighting controls such as in-fixture lights or zonal control, daylight harvesting, high-end trim, and energy and IoT data monitoring.
