

ONE SOLUTION FOR INTERIOR & EXTERIOR APPLICATIONS

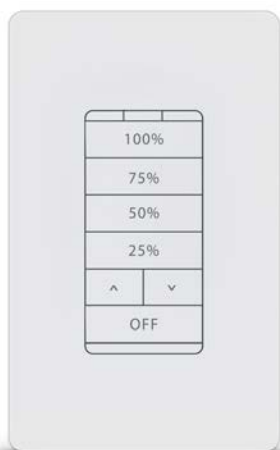

Avi-on App

Facility managers want simple lighting controls

Most networked lighting controls are too complicated to install in outdoor settings. Other systems struggle when distanced from the building IT infrastructure. And, sealing network equipment to the elements is always a challenge. Building owners/operators want solutions that optimize energy savings, can be self-managed, and do not require IT support. Most of all, facility managers need a solution that just works.

Avi-on makes controls that are easy to install, easy to use, and easy to change. We keep it simple. You and your team can customize the configuration before, during, and best of all...after installation.

Dimming
Wall Station

- **Gateway-free, Distributed Control**
Gain optimal energy savings without a complicated gateway: no single point of failure, no extra cost/hassle, and no special network or panel installation...indoors or out
- **Virtually Unlimited Range**
Mesh networking allows full coverage of luminaires and sensors without repeaters or gateways
- **Hassle-free App Programming**
Intuitive tools enable rapid setup of sensors, schedules, and zones. Easily mix sensors and schedules, then create control strategies that give visitors convenience and security along with energy savings
- **IT-friendly Policy**
Run the system stand-alone, or use a cell modem to avoid core IT network integration
- **Optional Cloud Connectivity**
Manage user access control, device configurations, remote diagnostics, and future reporting/upgrades with a robust, utility-grade platform and web application

Companies choose Avi-on to maximize their ROI

Avi-on maximizes utility rebates, annual energy savings, productivity, safety, and convenience... while reducing installation and ongoing maintenance costs and providing flexibility to reconfigure how the lighting in spaces operates using software instead of re-wiring.

Fixtures with
Avi-on LVFA

Distributed control allows any fixture to be in any group or scene, thus enabling tailored lighting for any occasion

Direct Connect™
PIR Sensor

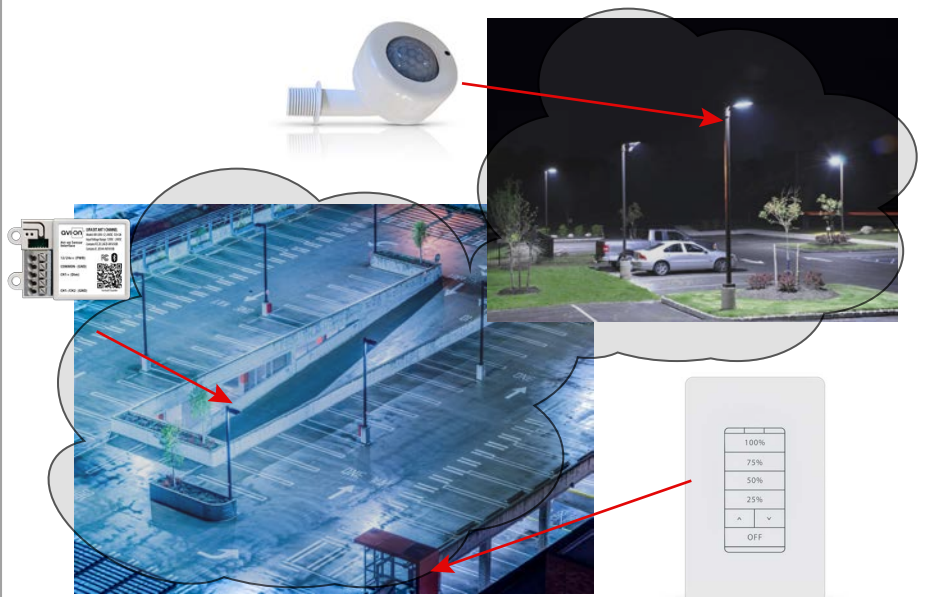

Intelligent Zoning

- Flexibly group and zone lights. Improve safety and security by tying sensors at entry points and intersections so that a pedestrian or car will trigger a whole row at a time
- Combine scheduled operations plus sensors to manage lighting whether the facility is open, or closed...all without gateways, complicated panels, or special networking equipment

Virtually unlimited coverage

Avi-on mesh provides worry-free wireless connectivity and can grow as your needs do.
