

ONE SOLUTION FOR **INTERIOR & EXTERIOR** APPLICATIONS

COMPANIES CHOOSE AVI-ON TO MAXIMIZE THEIR ROI

Avi-on maximizes utility rebates, annual energy savings, productivity, safety, and convenience... while reducing installation and ongoing maintenance costs and providing flexibility to reconfigure how the lighting in spaces operates using software instead of re-wiring.

Low Voltage
Fixture Adapter

Distributed control allows any fixture to be in any group or scene, thus enabling tailored lighting for any occasion

Override Wall Station
(Indoor)

Direct Connect PIR
Daylighting Sensor

FACILITY MANAGERS WANT **SIMPLE LIGHTING CONTROLS**

Most networked lighting controls are too complicated to install in outdoor settings. Other systems struggle when distanced from the building IT infrastructure. And, sealing network equipment to the elements is always a challenge. Building owners/operators want solutions that optimize energy savings, can be self-managed, and do not require IT support. Most of all, facility managers need a solution that just works.

Avi-on makes controls that are easy to install, easy to use, and easy to change. We keep it simple. You and your team can customize the configuration before, during, and best of all...after installation.

Gateway-free, Distributed Control

Gain optimal energy savings without a complicated gateway: no single point of failure, no extra cost/hassle, and no special network or panel installation

Flexible Control Strategies

Mix scheduled and sensor-based controls with no gateway required

Secure

UL 1376 Diamond IOT security rating + DLC 5.0 compliant for energy efficiency

Hassle-free Commissioning

Intuitive tools enable rapid setup and changes to any combination of sensors, zones, schedules, and scenes

IT-friendly Solution

Run stand-alone or use a cell modem to avoid corporate network integration

Control the Whole Property

Combine indoor and outdoor lighting control in one easy to use solution

Optional Cloud Connectivity

Manage user access/control, device configurations, remote diagnostics, and future reporting/upgrades with a robust, utility-grade platform and web application

INTELLIGENT ZONING

- Flexibly group and zone lights. Improve safety and security by tying sensors at entry points and intersections so that a pedestrian or car will trigger a whole row at a time
- Combine scheduled operations plus sensors to manage lighting whether the facility is open, or closed...all without gateways, complicated panels, or special networking equipment

VIRTUALLY UNLIMITED COVERAGE

Avi-on mesh provides worry-free wireless connectivity that grows with your needs for interior and exterior applications..

Low Voltage Fixture Adapter

Override Wall Station (Indoor)
